USA Children’s & Women’s Hospital is among less than ten freestanding hospitals in the United States dedicated specifically to the health care needs of children and women. The idea of pairing a children’s sculpture park and a hospital is based on something that we have done for many years at USA Children’s & Women’s Hospital. We have provided a place that, in every way, supports the healing process.

The Geri Moulton Children’s Park, located in a wooded setting along the hospital’s entrance drive, provides a tranquil place where children can set aside thoughts of injury and illness, where families can find respite from worry, and where the community can learn behind the stories of everyday life.

The park is filled with more than 50 life-size bronze sculptures depicting children and families, providing a wonderful place of enjoyment and contemplation, and new sculptures are constantly being added. Patrons, patient families and hospital friends donated all the sculptures. Because of their generosity, Mobile is home to one of the country’s premier sculpture parks.

The USA Board of Trustees in 2009 named the park in honor of Geri Moulton, wife of USA President Gordon Moulton, for her long-term efforts that led to the creation and success of the park in honor of Geri Moulton, wife of USA President Gordon Moulton, for her long-term efforts that led to the creation and success of the park.

Admission to the park is free and the park is open every day of the year. For more information, please visit us at www.southalabama.edu/usacwh
